Ask us how!

occupational safety powered industrial truck cert.

The 32-hour Powered Industrial Truck Program is intended to educate and produce skilled and successful operators. Participants will gain both valuable knowledge and critical hands on experience designed to reflect a multitude of powered industrial truck operations and applications in various industrial environments. All operators are required to pass each phase of the course curriculum.

During each training module, participants will engage in a variety of activities and hands on practice exploring the following topics: **SAFETY; EQUIPMENT; LOADS; ANCILLARY EQUIPMENT; STACKING/RACKING/LOADING; CHECKLISTS & INSPECTIONS;** and a **WRITTEN & DRIVER'S OBSERVATION EXAM.**

For more information and to register, call 217/351-2235

8 AM - 5 PM, Tuesdays & Thursdays, Sept. 18-27, 2018

*offer only valid for powered industrial truck certificate
